Intern Onboarding Guide

Northstar Systems Pvt. Ltd. | Internal demonstration document | Access level: intern

Notice: This is synthetic demo content created to test SecureRAG. Northstar Systems is fictional.

Purpose

Fictional demonstration document for Northstar Systems Pvt. Ltd. This guide explains basic intern onboarding.

Working hours and attendance

The standard internship workday is 10:00 AM to 6:00 PM, Monday through Friday. Interns record attendance through the company portal.

If an intern expects to arrive more than 15 minutes late, they should inform their assigned mentor before the workday begins.

Mentorship

Every intern is assigned a mentor. The mentor is the first point of contact for task clarification, code reviews, and day-to-day questions. Interns should share a short progress update at the end of each working day.

Equipment and security

Company-issued laptops must be used for company work. Interns must not share passwords, access tokens, or multi-factor authentication codes. Lost devices or suspected account compromise must be reported to IT immediately.

Leave and absence

Interns receive 1 paid leave day for every completed month of the internship, up to 3 days for a three-month internship. Unplanned absence should be reported to the mentor and HR.
